

# Molten metal treatment products for copper & brass alloys, magnesium alloys and zinc alloys.

## Copper & Brass alloys

### Cupral

Powdered fluxes for covering and drossing off copper alloys containing aluminium (cuproaluminium).

### Cuprotex

Powdered fluxes for drossing off and cleansing brass alloys in electric-induction or gas fired crucible furnace.

### Cuprogen

Tablets for degassing and grain refining brass alloys in crucible furnaces.

### Deox

Deoxidizing tubes containing additives to improve metal fluidity and density.

### Hydrocote

Water dilutable coatings for sand mold and cores.

### Metalcote

Release agents for gravity molds, lubricants for brass pressure die-casting and extrusion of brass alloys.

### Oxibron

Oxidizing and protective fluxes for gun metals and bronze alloys.

### Riduxal

Fluxes to reduce presence of aluminium in copper alloys.

### Thermol

Exothermic topping powders for risers and feeders in sand mold castings.

### Zincogen

Protective and cover flux for zinc alloys.

## Magnesium alloys

### Magnesil

Fluxes in powder for melting under protective cover and cleansing magnesium alloys.

### Magcote

Release agent for high pressure die casting of magnesium based alloys.

## Zinc alloys

### Lubrix

Release agents for high-pressure die-casting.

### Zincogen

Protective and cover flux for zinc alloys.
